Table of contents

01

Introduction

Introduction

Background

1. Digitization, Intelligentization
2. Increased ownership of smart devices,
3. The expansion of app stores(App Store, Google Play)

Goal

software data in the Apple App Store.

Method

Clustering, Heatmap, Correlation

Data Set

Applications published in the Apple IOS store.

```
<class 'pandas.core.frame.DataFrame'>
RangeIndex: 7197 entries, 0 to 7196
Data columns (total 17 columns):
#   Column              Non-Null Count  Dtype
---  -
0   id                   7197 non-null  int64
1   track_name           7197 non-null  object
2   size_bytes           7197 non-null  int64
3   currency             7197 non-null  object
4   price               7197 non-null  float64
5   rating_count_tot     7197 non-null  int64
6   rating_count_ver     7197 non-null  int64
7   user_rating          7197 non-null  float64
8   user_rating_ver      7197 non-null  float64
9   ver                  7197 non-null  object
10  cont_rating          7197 non-null  object
11  prime_genre          7197 non-null  object
12  sup_devices.num      7197 non-null  int64
13  ipadSc_urls.num     7197 non-null  int64
14  lang.num             7197 non-null  int64
15  vpp_lic              7197 non-null  int64
16  app_desc             7197 non-null  object
dtypes: float64(3), int64(8), object(6)
memory usage: 956.0+ KB
```

02

Analysis

NEW!

Top 5 App category

prime_genre	count
Games	3862
Entertainment	535
Education	453
Photo & Video	349
Utilities	248

Genre

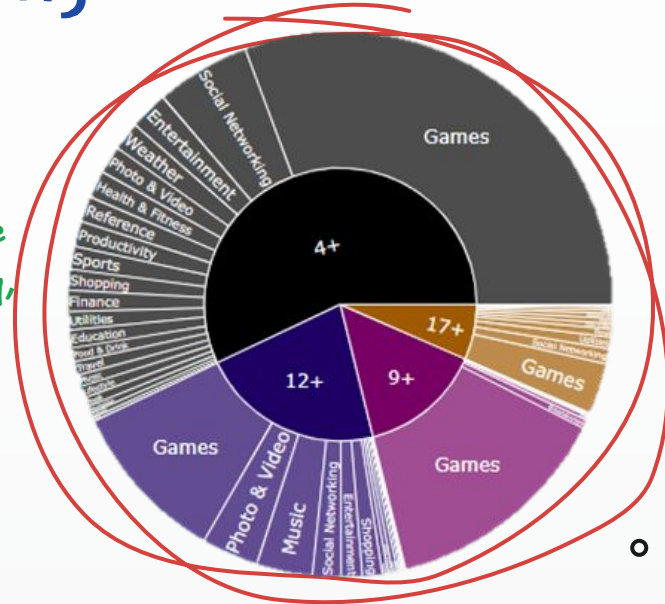

Game is dominant

Content Rating

- 4+ content is the most
- Each age group has corresponding game prevalence of mild violence, pornography, gore and other horrific content

Price Distribution by App Genre

Medical has the greatest price range and highest average price

Price-count plot

- Most of the apps are **FREE**
- The distribution of price count is between 0 to 9.99 USD

Size bytes plot

- Games have the most outliers
- Most of the genres' sizes are less than 500 MB.

Average Size of app in different genres

Mean App size(MB) depending on Prime genre

Medical is the first, go with
Games, and **Education** and
Book are about the same.

Paid APP and Free APP Rating

Higher than 4.0

Better user experience

0 Rating: 700

Bad user experience

- keeps crashing
- too many ads

Comparison between Current Version & all Versions

All versions ratings in
3.5-4.5 star
current version
ratings in 2.5-4.5
star

Relationship between ratings and the number of ratings

When the quantity is larger, the grades is high
but for the less quantity, the ratings can vary.

App text length and number of displayed images

Most apps display interface details with text length between 750-1500 words and 5 images

○

Correlation

The most relevant

user rating of all versions
and user rating of current versions

The correlation between

the number of languages supported
and user rating

Screenshot correlates with user rating

Pricing relative APP_size

Clustering

optimal value: $K=3$

Clusters of orange:

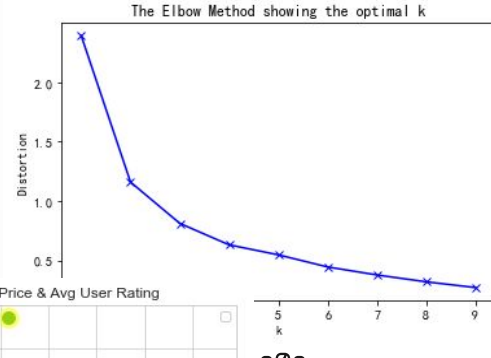

populated by users who download

free APPs or fewer than \$5.

Clusters of GREEN:

more expensive APPs

◦ **Conclusion**

03

Conclusion

- Considerable competition for Game App development .
- Better download for free, specialized Apps need to be paid (ie. medical)
- App prices are overwhelmingly focused on \$9.99 or less.
- The content rating range of most types of apps is 4+.
- Current version ratings mostly are lower than all versions ratings.
- There is a significant positive correlation between price and size.
- Most of the genres' sizes are less than 500 MB.
